

# Partner Package for CLM Intelligent Repository

## Quick Start Implementation Package

**NEW CUSTOMERS:** Intelligent Repository Offering onboards your team to a best-in-cloud CLM repository extremely quickly. In as little as 1 week, our team leverages DocuSign CLM and AI to create a centralized storage place for your pre and post execution documents go-forward.

**EXISTING CUSTOMERS:** If you are an existing eSignature user looking for a better way to execute, organize, and report on your agreements, this repository is the answer to getting that up and running quickly and efficiently.

### Post-execution agreements:

- Configured for users to move signed DocuSign agreements from their existing DocuSign eSign process to the CLM Repository

### Pre-execution agreements:

- Configured for users to upload agreements to DocuSign CLM > use CLM OOTB features for internal collaborations, redlining, editing, and Send for Signature.

### DocuSign AI and CLM Repository:

- DocuSign AI capture 4 basic metadata fields (Party, Document Type, Effective Date, Expiration Date)
- Single repository with reporting and OCR capabilities
- Includes enablement

### Team

- 1 Project Manager
- 2 DocuSign Accredited CLM Implementation Consultants

---

Total Duration: Up to 2 Weeks
