

# Client Success: Leading healthcare institution

Accelerate visibility into internal and external contract portfolios to identify and extract wide range of contract terms and clauses

## CLIENT CHALLENGE

The client needed to identify and extract multiple terms and clauses from a large contract population with internal and external parties.

Additionally, the client wanted to identify specific language contained in network provider manuals.

Finally, the client wanted a solution that could be used on a go forward basis for net new documents to capture the holistic view versus a snapshot in time from a costly manual review.

## CIMPLIFI SOLUTION

Cimplifi provided accelerated delivery of a solution with multiple custom AI models to identify and extract critical information from a massive document population.

- Library of custom models
- Model Validation
- Two month turn around on delivery per client required timeline
- Table data extraction
- Implementation training with incumbent team to manage solution and independently build and tune

## BUSINESS RESULTS

As a result of Cimplifi engagement with the client's use case, the client achieved:

- Ability to leverage their custom solution for future documentation on net new contracts
- Utilize the solutions to create efficient workflows for extracting key terms for third-party papering, etc.
- Center of Excellence established
